Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 978 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 978 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571) 272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Zito on November 25, 2005. The application has been amended as follows:

In Figure 1, insert the label "Prior Art".

Allowable Subject Matter

2. Claims 6,7,9-13 are allowable over the prior art of record.
3. The following is a statement of reasons for the indication of allowable subject matter:
As per independent claim 10, the recited claim limitations pertaining to calculating a noise identification threshold and a voice identification threshold, wherein the values of the differing types of energy calculations used to determine these thresholds are the values that are within a range of initial calculated average value, is not explicitly taught by the prior art of record.

Art Unit: 2655

As per independent claim 6, the recited limitations pertaining to counting the number of consecutive times the G.729B VAD detects voice frames, assigning a count to a counter variable base on the voice frames, and producing a specific event when the second counter reaches a predetermined variable, all in conjunction with a first counter, is not explicitly taught by the prior art of record.

A typical prior art, as noted below in Benyassine et al ("ITU-T Recommendation G.729 Annex B: A Silence Compression Scheme for Use with G.729 Optimized for V.70 Digital Simultaneous Voice and Data Applications", IEEE Communications Magazine, September 1997, pp 64-73), teaches the concept of using multiple energy measurement values (pp 66, bottom of col. 1 to the end of col. 2), however, Benyassine et al does not explicitly disclose the calculation as claimed in claim 10 as noted above. Benyassine also teaches tracking the number of instances of noise/silent periods in the G.729B VAD (pp 67, col. 1 lines 44-60; and pp 68, col. 1, bottom – DTX update counter); however, Benyassine et al does not explicitly disclose a second counter tracking the voice frames in a G.729B VAD, in conjunction with a first counter. Furthermore, it would not have been obvious to one of ordinary skill in the art of VAD to modify the teachings of the prior art of record to obtain the recited claim limitations of claims 8 and 10 as noted above.

Claims 9,11-13 are allowable over the prior art of record because these claims depend from claim 8,10 respectively, which have been determined to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Opsasnick, telephone number (571)272-7623, who is available Tuesday-Thursday, 9am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Wayne Young, can be reached at (571)272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
